PROFESSIONAL PROFILE

Software Development professional with experience and knowledge in Web Development, Programming, Databases, Microservices, and Software Analysis. Skilled in gathering and analyzing client requirements, actively involved in all phases of software and web application development (back-end and front-end). Experienced in creating and managing databases, as well as contributing to process analysis and improvement. Collaborates effectively with technical teams in the implementation of projects and tasks.

Committed to continuous learning and professional growth. Team-oriented, with strong problem-solving abilities, communication skills, analytical thinking, attention to detail, and results-driven mindset. Strong planning and organizational abilities. Certified in SCRUM methodology and holder of a Software Development Technician diploma. Programming languages: TypeScript, C#, Java. Web development: Angular, React, .NET, Spring Boot. Databases: SQL Server, PostgreSQL. Version control: Git (Github, Bitbucket). Containers: Docker. Technical English. Category B-1 driver's license. Immediate availability.

WORK EXPERIENCE

OCX Group

Full Stack Developer

January 2023 - Present

- Designed and managed MS SQL Server and PostgreSQL databases, ensuring efficient and secure data storage and access.
- Developed business logic and server functionalities using .NET and Spring Boot, managing interactions with databases and frontend communication.
- Built and optimized user interfaces with Angular and React, translating technical requirements into a seamless and effective user experience.
- Assisted in evaluating and improving existing processes, increasing software efficiency and enhancing user satisfaction.
- Proposed and implemented new features, ensuring the software stays updated with industry trends.
 - Collaborated with multidisciplinary teams to deliver high-quality software solutions.
 - Kept up to date with the latest technologies, applying best practices to optimize software performance.

Aura

Full Stack Developer

August to December 2022

- Designed and implemented a customized control system for equipment and technical staff, tailored to the company's specific needs.
- Developed an automated reporting system, optimizing company processes and improving efficiency and productivity.
- Designed and created a SQL Server database from scratch, ensuring an optimized structure for data storage and retrieval.
 - Implemented business logic using .NET, enhancing data flow between the server and the user interface.
- Designed and developed the user interface with Angular, delivering a smooth and functional experience for the control system.

EDUCATION

Bachelor's Degree in Software Development (*Currently pursuing*) –CENFOTEC University

Software Development Technician – CENFOTEC University
Scrum Fundamentals Certified (SFC) – ID 904377
